Assignment 3: Quiz + A Coding Task

- One quiz (10 points)
 - Logical formula and predicate logic
 - Z3's knowledge and translation rules
- One coding task (15 points)
 - **Goal:** manually translate code into z3 formulas/constraints and verify the assertions embedded in the code.
 - **Specification and code template:** <https://github.com/SVF-tools/Teaching-Software-Verification/tree/main/Assignment-3>
 - **SVF Z3 APIs:** <https://github.com/SVF-tools/Teaching-Software-Verification/wiki/Z3-API>

You are encouraged to finish the quizzes before starting your coding task.

Intraprocedural Example

```
void main() {  
1  int *p  
2  int q;  
3  int *r;  
4  int x;  
5  p = malloc(...);  
6  q = 5;  
7  *p = q;  
8  x = *p;  
9  assert(x == 10);  
}
```

Source code

```
1 expr p = getZ3Expr("p");  
2 expr q = getZ3Expr("q");  
3 expr r = getZ3Expr("r");  
4 expr x = getZ3Expr("x");
